## Specification

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

### Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
  - Field of the Invention.
  - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (a) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (i) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (I) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a

nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

## Claim Objections

Claims 1-25 are objected to because of the following informalities: Although the phrase "characterized in that" is acceptable to use. The phrase – comprising – or – including – is preferable to use in order to comply with the U.S. practice. Appropriate correction is required.

Application/Control Number: 10/582,651

Art Unit: 1797

Claims 1-25 are objected to under 37 CFR 1.75(c) as being in improper form because of multiple dependent claims. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

## Claim Rejections - 35 USC § 112

Claims 1-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, the phrase "the vacuum cleaner bag contains a material which can be whirled up under a given air flow" is ambiguous and indefinite. The word "whirl" means rotate. What kind of material on the vacuum cleaner bag makes the bag rotate under a given air flow? It does not make any sense. In addition, the specification fails to describe this limitation "a material which can be swirled up under a given air flow". Clarification is requested.

Claims 1-25 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are: the vacuum cleaner bag contains a material which can be whirled up under a given air flow.

#### Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Application/Control Number: 10/582,651

Art Unit: 1797

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-25 are rejected under 35 U.S.C. 102(e) as being anticipated by the European Patent (EF 0960645 B1).

The European reference teaches a vacuum cleaner bag which has multiple layers comprising a meltblown layer and a spunbond layer (page 2, lines 30-31) wherein the material has cellulose fibers such as paper (page 3, lines 2-8), spunblown nonwoven with a scrim about 13 g/m2. The material having synthetic fiber (see page 5, line 57 through page 6, line 13, page 7, line 52 through page 8, line 1) such as polyamides, polyesters or polyolefins, and the spunbond can be electrostatically charged (page 6, line 13, page 8, lines 15-20). The European reference further teaches the length of fibers may range from 0.5 to 15 mm or 0.5 to 3 mm (see page 7, lines 47-51).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MINH-CHAU T. PHAM whose telephone number is (571)272-1163. The examiner can normally be reached on Mon/Tues/Thur/Fri 7:00 am - 5:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Duane Smith can be reached on (571) 272-1166. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
